Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer full-time position recently posted on your website. I will be graduating this May from the Viterbi School of Engineering at University of Southern California. As you will see from my resume, I have the requisite skills you are looking for to be a successful in this position. More importantly, I have the passion and drive to make a difference in the company.

I am very comfortable in C++ and Python programming languages. I have an internship experience at Tintri Inc. last summer where I worked in platform team to automate test suites and also developed and full stack web application. In addition to this, I have a one year work experience as a Software Developer at Samsung Research & Development India, Bangalore. I worked on web development, server-side programming and unit and module testing. My experience has given me excellent knowledge about software development life cycle. Apart from this I have also learned to adapt to various work culture, prioritize the work in hand, knowledge sharing.

As a graduate student at USC I have taken up courses based on Artificial Intelligence, Machine Learning, Natural Language Processing, Databases and Operating Systems. I have built applications such as chat bots and agents for the slack app using these concepts apart from my course curriculum projects.

Above all, I am confident that my knowledge in the Information Technology area coupled with my experience and strong technical skills in software languages will prove an asset to any organization and add immediate value to the organization. I would be really happy to discuss my projects and my background in greater detail. Thank you for your time and consideration. I look forward to speaking with you soon.

Sincerely,

Shreyas Govinda Raju
